

## #FUNDTHEFORMULA CAMPAIGN

# Prioritizing \$550M for Schools in the Governor's FY27 Budget and State of the State Address

JAN – FEB

## ADVOCACY TOOLKIT

The Time to Act on Behalf of Illinois' Students is Now!

**Call for \$550M for Schools** (\$450M for the Evidence-Based Funding (EBF) Formula and \$100M for Mandated Categoricals (MCATs) in FY27).

# About Funding Illinois' Future

We are a coalition of more than 100 school districts, leaders, parents, educators, community, civic, and faith-based organizations that helped fix Illinois' school funding formula in 2017 with our fierce advocacy for the historic implementation of the K-12 Evidence-Based Funding (EBF) formula.

Today, we continue our fight for equitable and adequate funding for all K-12 schools and providing every Illinois student with the excellent education they deserve.

“

“Let's fund our students' future because now more than ever our education is under threat and attack. In the state of Illinois, we need adequate funding for kids to continue to learn and be taught safely and appropriately. Our school district here in South Berwin is only getting 80% of the funding that they need for our students, and I want kids to have 100% in every district to learn and have the supports that they need.”

— **Educator and Advocate from Berwyn, Illinois**

# About the Evidence-Based Funding Formula (EBF)

In 2017, the landmark Evidence-based Funding (EBF) formula overhauled Illinois' existing K-12 education funding system, replacing an outdated and inequitable structure with a formula that prioritizes the state's least well-funded districts, distributes funds based on a research-based estimate of what schools need to fully serve students, and considers differences in student needs across districts.

The EBF formula was designed to address long-standing funding inequities in Illinois' K-12 education systems. [The Evidence-Based Funding \(EBF\) formula](#) calculates education costs based on student needs and distributes new state dollars to school districts furthest from full funding. This is possible only when the state invests additional amounts through the formula each year.

## How the Evidence-Based Funding (EBF) Formula Works

**FUNDING  
FOR  
THE  
FUTURE**  
Better Funding for Better Schools

### OVERVIEW OF EBF

The formula prioritizes equity by using an adequacy-based cost model and an equitable distribution formula. This means that EBF directs additional funding to districts that need it most because local wealth is unevenly distributed throughout the state.

#### 1. ADEQUACY-BASED COST MODEL

How much does providing high quality education cost, based on individual student needs?

----- Adequacy Target

#### 2. EQUITABLE DISTRIBUTION FORMULA

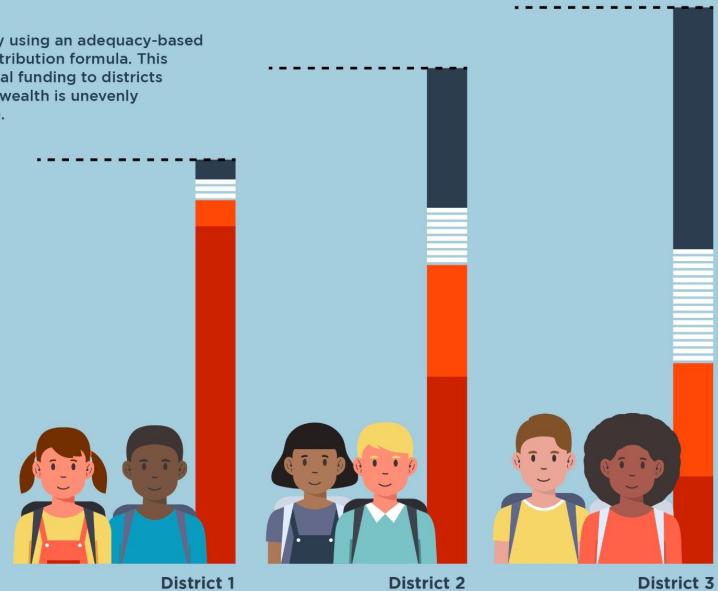

How well funded is the district?

■ Gap to Adequacy

■ New EBF Tier Funding  
How is new money from the state distributed?

■ Base Funding Minimum  
How much does the state currently contribute?

■ Local Capacity Target  
How much can the district contribute?

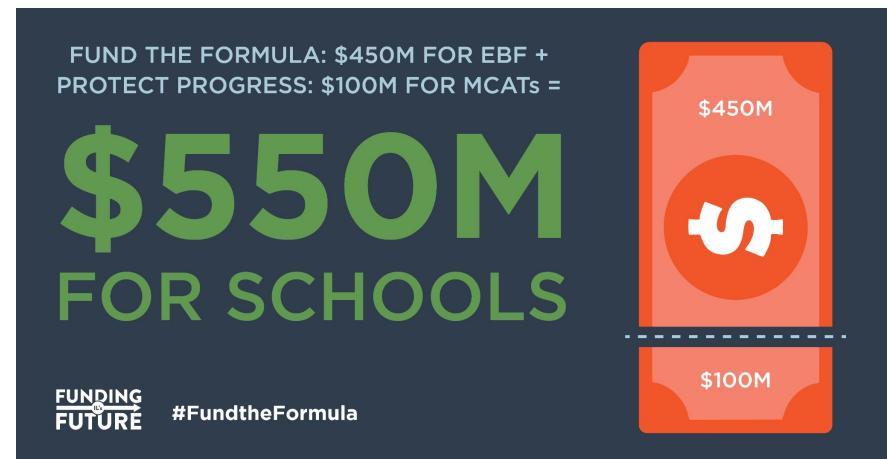

# About Mandated Categoricals (MCATs)

Mandated Categoricals (MCATs) are **state grants earmarked for specific programs or student populations**, as required by statute. These funds can only be used for their designated purpose and are essential for covering critical student services **not included in the EBF formula**. MCATs include:

- Illinois Free Lunch & Breakfast Program
- Orphanage Tuition
- Special Education – Orphanage Tuition
- Special Education – Private Tuition
- Transportation – Special Education
- Transportation – Regular/Vocational

Two MCATs must be fully funded each year by law: orphanage tuition and special education orphanage tuition. The remaining programs are **prorated—meaning districts are reimbursed only for a portion of their costs**. In FY26, **MCAT appropriations fell short of district claims by more than \$500 million**, leaving schools to fill the gap.

When MCATs are underfunded, districts must divert EBF dollars to cover legally mandated costs—**diluting the impact of EBF and perpetuating inequity**. Increasing MCAT funding by **\$100 million** in FY27 will help stabilize district budgets, ensure compliance with state mandates, and allow EBF investments to reach classrooms where they’re needed most.

# Urge Governor Pritzker to Prioritize an investment of \$550M for Schools in FY27

Advocates,

We need your help to ensure Governor Pritzker prioritizes an increased **\$550 million for schools in the FY27 budget**.

Governor Pritzker has been a consistent champion for education, and his commitment to the **Evidence-Based Funding (EBF)** formula has been vital to Illinois' academic recovery and progress toward equity. We are grateful for his leadership and the strides made since EBF's passage in 2017.

But as we look toward the goal of fully funding Illinois public schools, the stakes are higher than ever for students, educators, and communities across the state.

Since its inception, EBF has reduced the number of **severely underfunded districts**—those below 70% of adequacy—from **459 to just 56**, proving that sustained investment works. Yet Illinois still faces a **\$3 billion funding shortfall**, and **3 in 4 students** continue to attend underfunded districts.

Inflation and rising costs have weakened the impact of recent increases—**what \$350 million covered in 2017 now costs nearly \$470 million today**. To stay on track toward full funding and ensure schools have the resources and stability they need, we must go further.

**Adequately funding MCATs**—such as transportation, special education, and free and reduced-price meal programs—**ensures districts can meet basic student needs** without pulling dollars away from classrooms.

Advocates across the state are calling for **\$550 million for schools in FY27**—including **\$450 million for EBF and \$100 million for Mandated Categoricals (MCATs)**. Together, these investments strengthen Illinois’ commitment to equity and ensure that every student, no matter their ZIP code, background, or income, has access to a high-quality education.

# Right now, we need bold action from our leaders to secure the future of Illinois students.

From now through February, we'll share **weekly social media messages, sample letters, and opportunities to submit testimony** to make your voice heard. Use this toolkit to personalize messages and share why increased investment in school funding matters to you and your community.

**Act today and share this toolkit with your network. Together, we can make sure the Governor's FY27 budget continues Illinois' progress toward fully and equitably funding our public schools.**

**Governor Pritzker, prioritize \$550M for Schools: Call for \$450M in EBF and \$100M for MCATs for Illinois Schools in FY27**

The time to act on behalf of Illinois students is now. We're calling on Governor Pritzker to prioritize an investment of \$550 million for schools in the FY27 budget—including \$450M for the Evidence-Based Funding (EBF) formula and \$100M for Mandated Categories (MCATs).

Since 2017, EBF has transformed the way in which Illinois funds schools, reducing the number of severely underfunded districts from 459 to 56. But rising costs and inflation have weakened the impact of annual increases, leaving three out of four students still in underfunded schools.

An investment of \$550M will keep Illinois on track toward fully and equitably funding our public schools, ensuring that every student—no matter their ZIP code—has access to the high-quality education they deserve.

Join advocates across the state and urge Governor Pritzker to #FundTheFormula and invest \$550M for Illinois schools in FY27.

Illinois Governor

Subject: (Please Tally this Request) Prioritize \$450M for EBF and \$100M for MCATs

Dear [[Recipient's Title and Name]],

**FY27 Funding IL's Future**  
Published by HubSpot · December 4, 2025 · [...](#)

**5 Things to Know About MCATs**

- 1 MCATs fund mandated services 
- 2 The state currently reimburses less than full cost 
- 3 Lack of funding creates an estimated \$500M gap statewide 
- 4 Fully funding MCATs means more money for education 
- 5 Fully funding MCATs strengthens both equity & adequacy 

**FUNDING  
FUTURE**

“

“EBF helps us provide targeted interventions to our most marginalized students like bilingual support, reading, math, and specialized instructional materials to help close the opportunity gap.”

— Educator from Dekalb, Illinois

# Advocacy Toolkit

Act today and share this toolkit  
with your network.

Together, we can make sure the Governor's FY27 budget continues Illinois' progress toward fully and equitably funding our public schools.

## What's in this toolkit:

### 01 Send a Letter to Governor Pritzker

Elevate the need to invest \$550M for Schools for the upcoming school year. Modify the letter to highlight your experience and let the Governor know why funding is crucial for Illinois' children.

### 02 Join Us in Social Media Advocacy

Share this toolkit and messages with members of your community. We need everyone's voice behind the #FundtheFormula campaign!

### 03 Learn About Other Stories

Throughout this toolkit you can learn more about the stories of students, educators, and other advocates from across the state.

“

“Our school community is strong but we need money to simply operate in this climate where education particularly education for the most vulnerable is under attack. Our kids are coming to us at the high school level at years behind where they need to be. We need more funding to ensure we are meeting their needs.”

— Illinois Education Advocate
